Remote Key Program Setting

Pay attention to the following items when set the remote key program:

1). When 2 main keys are learned, maximum another 10 additional main keys or specific keys can be added using this program.

2). One or more specific keys shall be learned as soon as the 2 learned main keys are taken out.

3). This program is used only for adding keys. It cannot delete previous learned keys.

4). The notch of the key to be learned must be consistent with the current key notch.

Please perform the setting according to the following procedures:

1). Insert previous learned main key to turn on the ignition switch with engine off.

2). Turn off ignition switch and pull out the key.

3). Insert the 2nd learned main key within 10s. Turn on the ignition switch with engine off.

4). Turn off ignition switch and pull out the key.

5). Insert the new key to be learned within 10s. Turn on the ignition switch with engine off. Vehicle will learn this new key.
