

Audi Battery Matching Function Operation

Function Description:

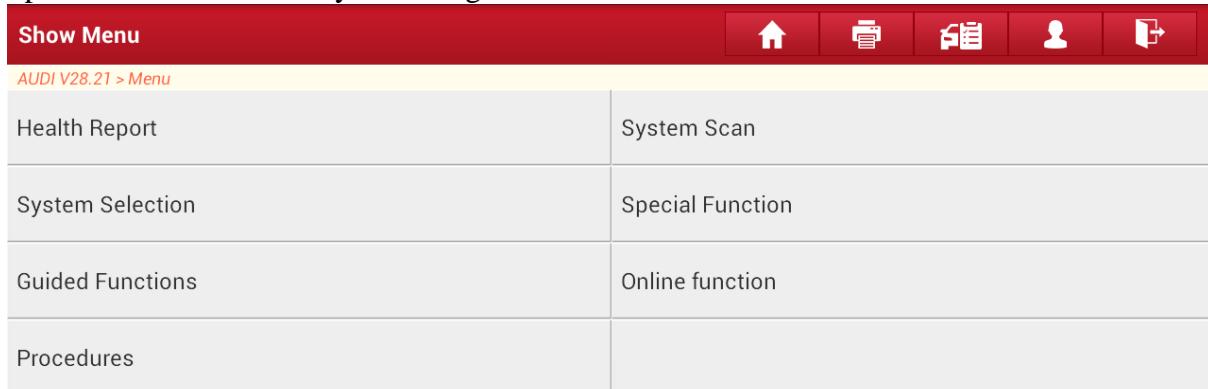

- When the vehicle battery is replaced due to damage or aging, you need to perform the battery matching function. If the new battery uses different technology from that of the old one, the control unit needs to be coded. At present, there are three different battery technologies: wet battery, glass fiber baffle battery, and EFB battery

Note:

- During battery replacement, if the vehicle is not equipped with 61 battery control system, you need to access the 19 gateway data bus system to operate.

Procedure:

- Turn on the ignition switch, connect Launch X431 PRO connector, and choose AUDI V28.21 > Special Function > Battery Matching.

AUDI V28.21 > Menu	
Health Report	System Scan
System Selection	Special Function
Guided Functions	Online function
Procedures	

Show Menu		Home	Print	Save	User	Exit
AUDI V28.21 > Special Function						
Reset Service	(i)	Brake Pad Change	(i)			
Throttle Learning	(i)	Steering Angle Learning				
Diesel Engine Special Function	(i)	Battery Matching	(i)			
Anti-theft function		Air suspension matching	(i)			
Headlamp adjustment		TV Activation				
Dealership Code	(i)	Airbag Reset				
Switching on Transport Mode		Switching off Transport Mode				

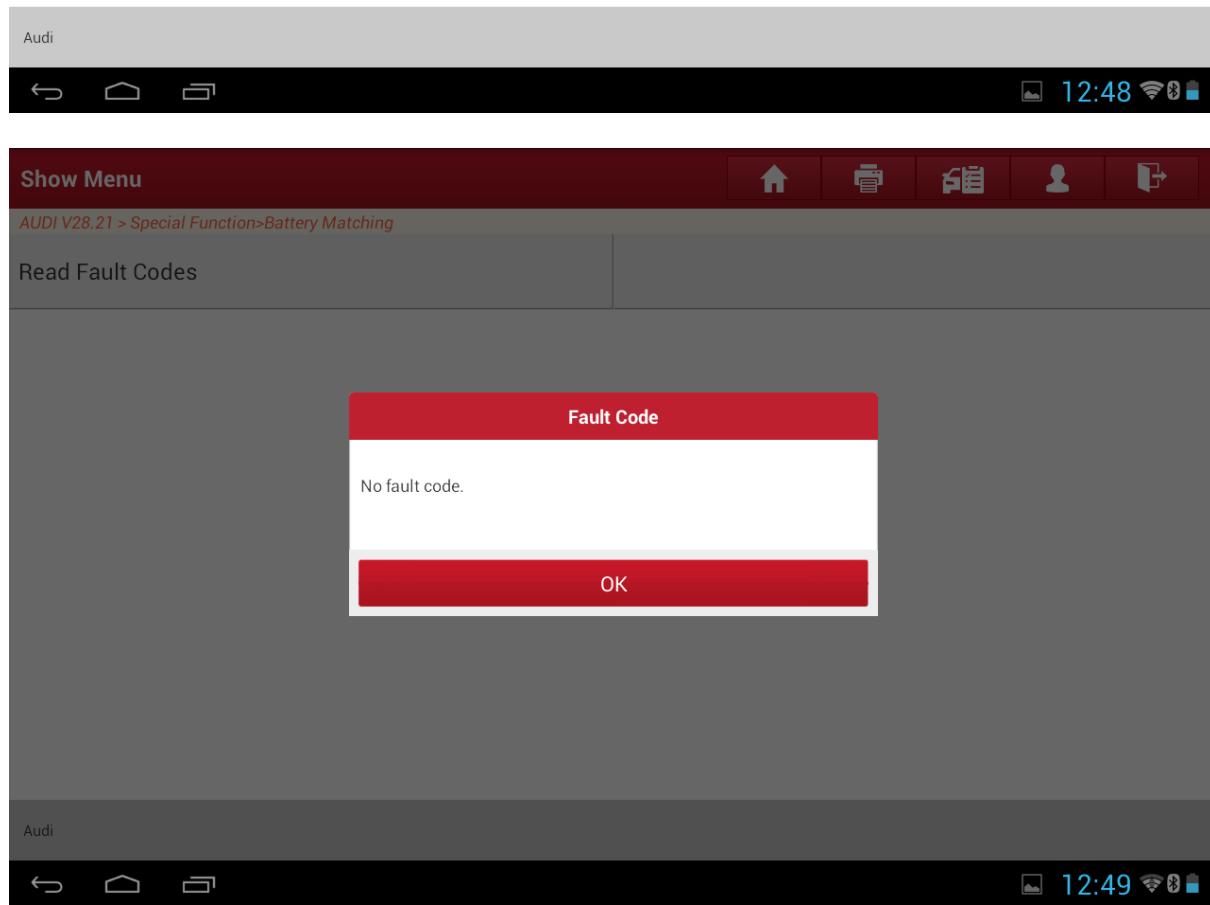

2) Choose 61 Battery Control and then choose the corresponding system according to the actual vehicle configurations.

Show Menu		Home	Print	Save	User	Exit
AUDI V28.21 > Special Function>Battery Matching						
19 Gateway Data Bus		61 Battery Control				

3) Read DTCs. Check that no battery-related DTC exists in the system.

4) Next, read the current battery parameters, including the battery maker, capacity, and serial number.

Active Test		
AUDI V28.21 > Special Function>Battery Matching		
Name	Value	Unit
Current battery parameter	0C 02 420922M1HW	
Battery manufacturer	JCB	
Battery capacity	105	Ah
Battery serial number	420922M1HW	

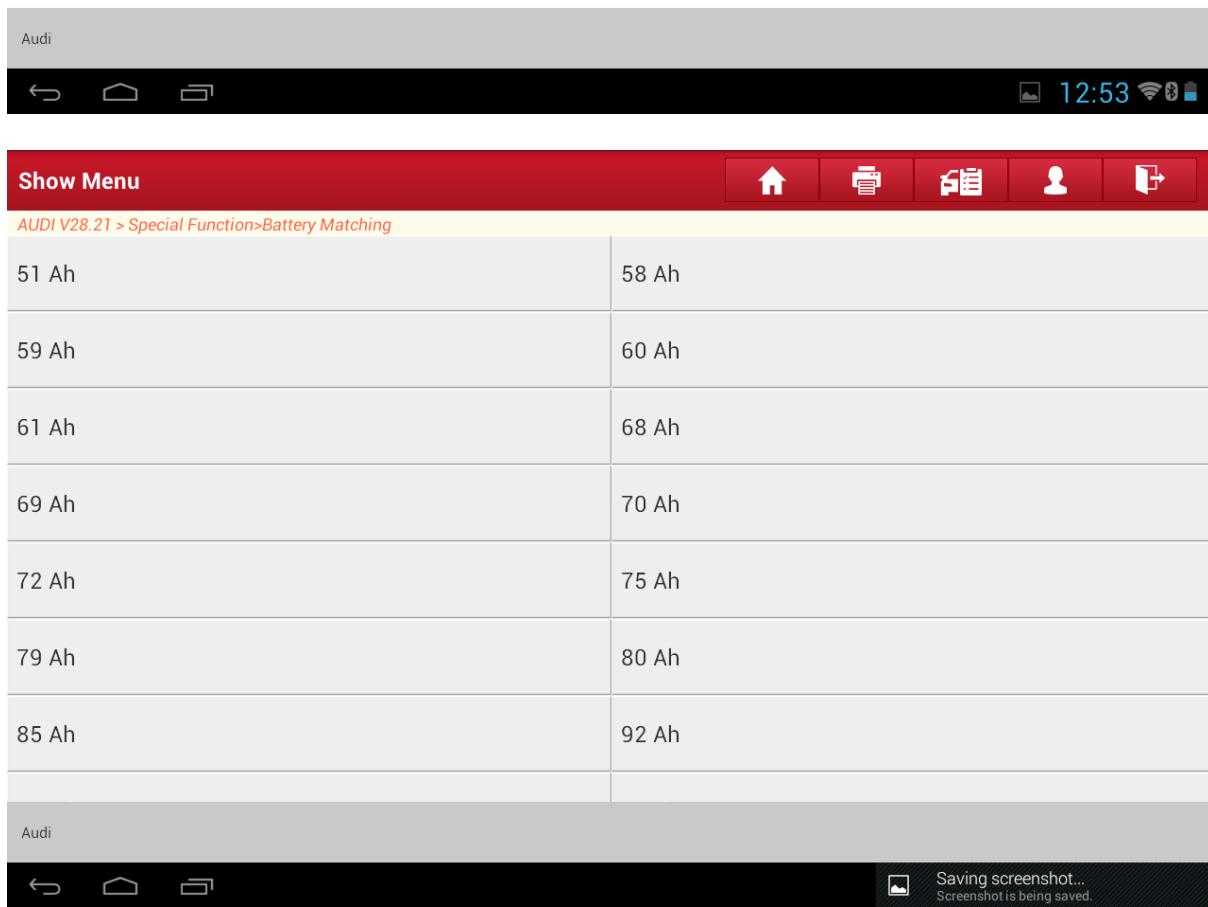

- 5) After reading, choose Configure New Battery Parameters to configure the battery maker, battery capacity, and the battery serial number in turn. Here, choose the battery maker VAO, capacity 80Ah, and serial number 0003B3F053.

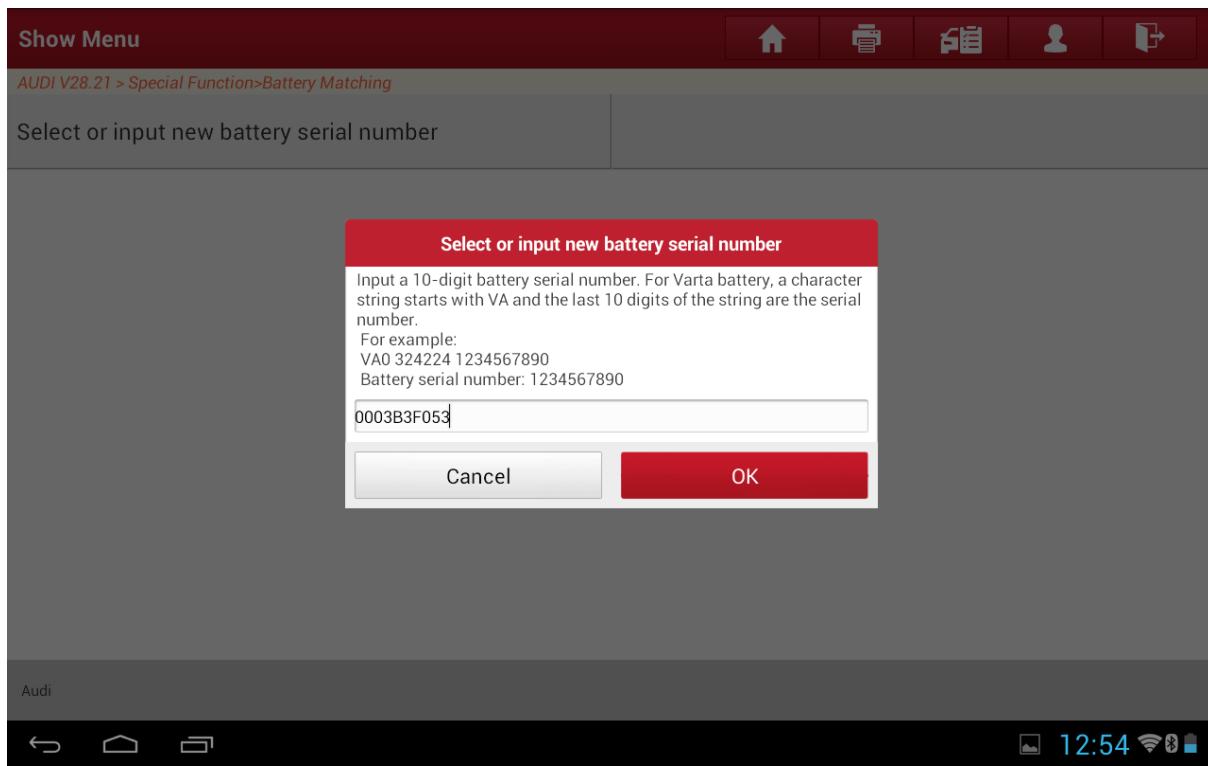

VARTA [VAO]	Exide [TU3]
Akuma [UM5]	JCI/JCB [JCB]
Moll [MLA]	JFF (Boading) /China [5DO]
Banner [BA2]	EPN [EPM]
Other battery manufacturer [***]	

6) Based on the hint and battery information, input the battery serial number 0003B3F053 and click OK.

7) Check that the parameter values are correct and choose Matching New Battery Parameter.

The screenshot shows the 'Battery matching' parameters for an Audi vehicle. The parameters listed are:

Name	Value	Unit
Battery matching	01 06 0003B3F053	
Battery manufacturer	VAO	
Battery capacity	080	Ah
Battery serial number	0003B3F053	

Below the table, there are two tabs: 'Description Battery parameter' and 'Matching New battery parameter'. The 'Matching New battery parameter' tab is selected. At the bottom of the screen, there is a status bar showing 'Audi', navigation icons, and the time '12:54'.

8) Matching is successful. The battery matching function is completed and exits.
