In order to facilitate customers to purchase corresponding cards according to their actual needs, we released several pay-per-use prepaid cards. The prepaid cards information is as follows.

No.	Description	ERP Code	Service card Prefix
1	Pay-per-use activation card: Activate Pay per use mode, which include 3 remote service request.	301180863	98871
2	Include 1 remote service request.	301180880	98852
3	Include 10 remote service request.	301180881	98851
4	Include 20 remote service request.	301180882	98850
5	Include 50 remote service request.	301180883	98848

Note:

1. Customers MUST purchase Pay-per-use activation card to activate pay-per-use mode. Then, they are able to purchase other prepaid cards.

2. All pay-per-use activation and recharge cards are valid for one year and only used for Smartlink

C remote service requests.

3. The number of times can be purchased repeatedly, and the validity period and the number of times will automatically accumulate.

4. After the validity period expires, if the number of purchases is not used up, it will be automatically cleared and can no longer be used unless they purchase another pay-per-use card.
i.e. A customer purchased 50 remote service card and 20 remote service remaining when it is invalid. He/she can purchase another "1 remote service" card to extend one year validation. So, the remaining remote service will be 21.

5. Every time a new Smartlink remote diagnosis appointment is published, the system will temporarily freeze the remaining available remote connections once, and the frozen times will temporarily not be used for new Smartlink remote diagnosis appointments. When the remote diagnosis appointment is cancelled or invalidated, the number of frozen remote connections will be automatically restored to be available and will not be deducted. When Smartlink remote diagnosis is completed normally, the number of remote connections will be officially deducted.
